**AMP**

**CONDUCTORS**- materials that have many free electrons and are transporters for the flow of electric current.

**CURRENT**

**ELECTRIC**

**HOOKS**

**KETTLE**- an overhead transformer.

**PIGTAIL**

**SKYWIRE**- a ground wire on top of poles and towers to protect the lines from lightning.

**VOLTAGE**

**BELL**- suspension or deadend insulators.

**COTTON**

**CURRENT**

**ENERGY**

**HOT**- a live or energized line.

**LINEMAN**

**POUCH**- a tool bag.

**TRUCK**

**WATT**- the unit of real power in an electric circuit.

**POWER**

**VOLT**

**BUCKET**

**CREW**

**DIRECT**

**FREQUENCY**- the number of complete cycles made per second.

**INSULATORS**- materials that have hardly any free electrons and inhibit or restrict the flow of electric current.

**PAD**- a pad mounted transformer.

**WRENCH**

**COTTON**  
ELECTRIC CO-OP
