## Is Your Water Safe?

### *Give Your Back a Break...Stop Adding Salt to Your Softener*

Minerals in your water form scale deposits that build up inside your pipes, water heater, shower heads, and other water using equipment like cholesterol in your arteries. These deposits significantly decrease the efficiency of your plumbing systems. Drinking water and icemakers are also negatively affected, as are health quality of water and taste. Hard water is not safe for you, your family or your home.

### Benefits of a No-Salt Water Conditioning System:

- Maintain healthy calcium & magnesium levels
- No sodium added to water
- No waste water vs. up to 10,000 gallons per year with salt softeners
- No environmental discharge of salt or chemicals
- Reduces iron staining
- Extends appliance life by 50% or more
- Descales inside of pipes & water heater
- Cleaner bodies, clothes, and dishes
- 25% or more reduced detergent use
- Clothing will last longer
- Cleaner more refreshing water
- Improves water heater efficiency and thus lowers energy bills

Time for New Year's Financial Resolutions

Many of us probably felt that 2020 lasted a very long time. But now that 2021 is upon us, we can make a fresh start – and one way to do that is to make some New Year's resolutions. Of course, you can make these resolutions for all parts of your life – physical, emotional, intellectual – but have you ever considered some financial resolutions?

Here are a few such resolutions to consider:

Don't overreact to events. When the coronavirus pandemic hit in mid-February, the financial markets took a big hit. Many people, convinced that we were in for a prolonged slump, decided to take a "time out" and headed to the investment sidelines. But it didn't take long for the markets to rally, rewarding those patient investors who stayed the course. Nothing is a certainty in the investment world, but the events of 2020 followed a familiar historical pattern: major crisis followed by market drop followed by strong recovery. The lesson

for investors? Don't overreact to today's news – because tomorrow may look quite different.

Be prepared. At the beginning of 2020, nobody was anticipating a worldwide pandemic and its terrible consequences, both to individuals' health and to their economic well-being. None of us can foretell the future, either, but we can be prepared, and one way to do so is by building an emergency fund. Ideally, such a fund should be kept in liquid, low-risk vehicles and contain at least six months' worth of living expenses.

Focus on moves you can control. In response to

pandemic-related economic pressures, some employers cut their matching contributions to 401(k) plans in 2020. Will some future event cause another such reduction? No one knows – and even if it happens, there's probably nothing you can do about it. Instead of worrying about things you can't control, focus on those you can. When it comes to your 401(k) or similar employer-sponsored retirement plan, put in as much as you can afford this year, and if your salary goes up, increase your contribution.

Recognize your ability to build savings. During the pandemic, the personal savings rate shot up, hitting a record of 33% in

April, according to the U.S. Bureau of Economy Analysis. It fell over the next several months, but still remained about twice as high as the rate of the past few years. Of course, much of this surge in Americans' proclivity to save money was due to our lack of options for spending it, as the coronavirus caused either complete or partial shutdowns in physical retail establishments, as well as dining and entertainment venues. But if you did manage to boost your own personal savings when your spending was constrained, is it possible to remain a good saver when restrictions are lifted? Probably. And the greater your savings,

the greater your financial freedoms – including the freedom to invest and freedom from excessive debt. When we reach a post-pandemic world, see if you can continue saving more than you did in previous years – and use your savings wisely.

These aren't the only financial resolutions you can make – but following them may help you develop habits that could benefit you in 2021 and beyond.

UNCOMFORTABLE?

Does your home have any of these symptoms?

- Rooms that get too hot or too cold?
  - High utility bills?
  - Thermostat wars with your spouse?
  - High humidity in summer?
  - House just never seems comfortable?
  - There doesn't seem to be enough airflow?
- Dust buildup within 2 days of dusting?
  - Problems with your system since it's been installed?
  - Anyone with allergies or asthma?
  - AC starts and stops frequently or runs all the time, and house is still not cool?
- Have been told by other contractors that the problem cannot be fixed?

If you answered YES to any of these questions, we can help!

Pippin Brothers has specialists that can pinpoint and correct these problems and, in many cases, you don't even have to replace your equipment, with the solution usually being easier and costing a lot less than you may think. There is no other contractor in Lawton more qualified than Pippin Brothers at diagnosing and correcting these annoying, inconvenient, unhealthy, comfort-compromising and energy-wasting concerns. Call us today and let us make your home **Feel As Good As It Looks!** After all, your home is your largest investment and you and your family deserve to be comfortable - don't you?
