Early Detection Saves Lives!

FREE Lung Screening For High Risk Individuals

ABOUT THE PROGRAM

- Lung cancer is the leading cause of cancer death for both men and women worldwide.
- Nearly 160,000 Americans die of lung cancer each year.

Based on findings of the National Lung Screening Trial (NLST), we know that CT lung screening can save lives of people at high risk for developing lung cancer.

Low-dose CT (LDCT) lung screening is quick and easy and results in a minimal amount of radiation exposure. The Cancer Centers of Southwest Oklahoma is determined to raise awareness and improve access to this testing for all people at high risk. Therefore, Cancer Centers of Southwest Oklahoma and Jackson County Memorial Hospital are now offering in conjunction **FREE LDCT lung screening** to individuals who meet the established high-risk criteria.

QUALIFICATION CRITERIA

You may qualify for a free LDCT lung screening if you fall into one of these categories:

Category 1

- You are between 55 and 74 years of age
- You are currently a smoker or have quit in the last 15 years
- You have a 30+ pack-year* history of smoking

Category 2

- You are between 50 and 74 years old
- You have a 20+ pack-year* history of smoking
- You have one additional lung cancer risk factor (not to include secondhand smoke exposure)

*pack-years are calculated by multiplying the number of packs a day you smoke by the number of years you have smoked.

Example: 2 packs a day for 15 years = 30 pack-years

Call to schedule a screening 1-877-231-4440 to see if you qualify.

Parting Shot

Many of the meters Josh Belcher visits each month are in out-of-the-way spots. He drives through a cotton patch to reach this one located along a fence line. See story, Page 8.
