Is Your Water Safe?
Give Your Back a Break...Stop Adding Salt to Your Softener
Minerals in your water form scale deposits that build up inside your pipes, water heater, shower heads, and other water using equipment like cholesterol in your arteries. These deposits significantly decrease the efficiency of your plumbing systems. Drinking water and icemakers are also negatively affected, as are health quality of water and taste. Hard water is not safe for you, your family or your home.
Benefits of a No-Salt Water Conditioning System:
Maintain healthy calcium & magnesium levels
No sodium added to water
No waste water vs. up to 10,000 gallons per year with salt softeners
No environmental discharge of salt or chemicals
Reduces iron staining
Improves water heater efficiency and thus lowers energy bills
Extends appliance life by 50% or more
Descales inside of pipes & water heater
Cleaner bodies, clothes, and dishes
25% or more reduced detergent use
Clothing will last longer
Cleaner more refreshing water

Cotton Electric's in-house vegetation management crew consists of TJ Birdwell, left, Michael Medcalf, Foreman Joe Moore and Taylor Rains (not pictured). The crew makes every effort to leave a

location safe and in good condition, possibly better than when they arrived. Vegetation management is a vital aspect of our line maintenance program, which includes clear cutting and trimming of trees

and herbicide application to prevent regrowth. This program is essential to maintaining a safe and reliable electric system as well as speeding up the outage restoration process.
